

## Set up Team Chat on Your Mac using Colloquy

You can keep up to date with your project from your desktop using the free Colloquy app for Mac.

{{>toc}}

### Download and install Colloquy

Download and install Colloquy from the [Colloquy downloads page](#).

### Create a new connection

Open up Colloquy. It will prompt you to create a new connection. If not, you can select File -> New Connection.

Select the Details button and enter your credentials. You'll find these credentials on in your Planio project in **Chat logs**.

- **Nickname:** enter your name
- **Server Protocol:** leave as **IRC (Internet Relay Chat)**
- **Chat Server:** enter the Host name
- Tick **Remember this connection**
- **Chat Server Port:** see your Planio account
- **SSL Connection:** make sure it's ticked (so your chat will be secure)
- **User name:** enter the User name
- **Server password:** enter the Server password
